To determine if any of the raw materials used to make the **One Week Diet** Concentrate contain pesticide residues, we sent representative samples to an outside laboratory for a full screening.

Analyses were done to test for 157 different pesticides.

The results—attached—show that no pesticides were detected. All results are "less than" the minimum detection levels established by the US FDA.

A handwritten signature in blue ink, appearing to read "C. Ordoñez", is written over a faint, illegible stamp.
